

## Wisenet WAVE 4.1 Open video platform

### Intuitive and easy to use

- An intuitive 'drag & drop' tool makes it extremely easy for operators to set up a display of live and recorded images on a single screen or video wall, with customisable layouts and sizes.
- A virtual PTZ which, with just simple clicks of a mouse, enables operators to zoom in to see close up detail of any suspicious activity.
- Motion detection and video analytics support can be configured to generate alerts when user defined incidents occur.
- A wide range of smart, keyword, calendar and time-slice search options facilitate rapid retrieval of recorded video.

Hanwha Techwin offers an entry level VMS called SSM and for sophisticated Enterprise level VMS projects, the company integrates with leading technology partners. Wisenet WAVE has been launched to answer the needs of projects in the middle ground with an emphasis on simplified user experience.

### SUNAPI 2.0 INTEGRATION

Hanwha Techwin has launched Wisenet WAVE with full SUNAPI 2.0 integration for WISENET cameras and recorders.

Full SUNAPI 2.0 driver has been rigorously tested with Wisenet P, X, and Q series cameras resulting in:

- Video/Audio Streaming
- Event – MD, Alarm
- PTZ
- Edge recording

### Key features – NVR monitoring, search & playback; and deep camera integration with:

- H.265
  - WiseStream
  - All triggering Events including sound classification, loitering and queue management
  - Simple focus setting
  - Multi directional camera support
  - Hallway view
  - HTTPS
  - Time Settings
  - Camera profile / Image configuration
  - PTZ preset sync
- NEW!**
- Health Monitoring Page
  - Hanwha Analytics Plugin
  - Chromium browser in-client
  - Direct Camera Webpage Access
  - Wisenet AI Camera Integration
  - Mobile Push Notifications

### An operating system to suit your needs.

Wisenet WAVE has applications for all major operating systems so our users are not limited by what device or operating system they choose to use on their desktops, mobile devices, rack mount servers, or even low-powered embedded devices.

Cloud

A cloud-based service that enables simple, centralised remote access and insight into any Wisenet WAVE system.

Desktop

A rich media player designed to view and manage a single Wisenet WAVE system from a desktop or laptop PC.

Mobile

A mobile app designed for viewing Wisenet WAVE system video and events while on-the-go.

Server

A media server responsible for discovering, connecting to, and managing system devices and data.
